

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Smallpox spread from Weedsport, prior to its recognition, to Auburn, Seneca Falls, and Cato, a single case in each with conspicuous illustrations of the protection by vaccination, and in all these places the end is practically reached; in Athens but one case remains; in New York City 1 death occurred and 3 cases have been reported during the month.

There was a normal average temperature of 72° F. for the month, with maximum of 94° F.; there were but six cloudy days and a total average rainfall of 3.03 inches, having been excessive about New York and deficient in the rest of the State.

TENNESSEE—*Nashville*.—Month of August, 1899. Estimated population, 110,834—white, 69,389; colored, 41,445. Total number of deaths, 170, including diphtheria, 1; enteric fever, 4; whooping cough, 2, and 29 from phthisis pulmonalis.

UTAH—*Salt Lake City*.—Month of August, 1899. Estimated population, 70,000. Total number of deaths, 60, including enteric fever, 1; whooping cough, 1, and 4 from phthisis pulmonalis.

WISCONSIN—*Milwaukee*.—Month of August, 1899. Estimated population, 285,000. Total number of deaths, 338, including diphtheria, 4; enteric fever, 4; scarlet fever, 1, and 26 from phthisis pulmonalis.
